Gnomes

To make a gnome use a combination of pinch pots and slabs with hand built additions.

**Step 1:**

Use a pinch pot to make the head

Step 2:

Roll a slab, cut a triangle and make a cone shape for the hat. (Bend it into a shape you like.)

Step 3:

Use pinch pots to make a squat body, or slabs rolled into cylinders for a longer body.

Step 4:

Hand build details like collars, shoes, grass, sticks, bugs etc…

Step 5:

Poke a hole through any hollow piece to make sure it has airflow.
